(54) Title: METHOD AND APPARATUS FOR PRESENTING A LIST OF ITEMS

(57) Abstract: A method and an apparatus for presenting a long list of items are described. An apparatus (1) is designed to display one page of items and a set of browse control tools (40) which include page indicators, the apparatus having user input means (4). The apparatus is designed to display a new page in response to user input commands. The apparatus is further designed to set a step length, i.e. the distance (number of items) between current page and new page, in response to user input commands. The browse control tools (40) comprise a plurality of hierarchic volumes (41, 42, ... 45), each volume comprising a plurality of page indicators (51, 52, ... 45).
